

The Hammer - Bug #108

regex search uses length of expression for highlighting

Description			
<p>When finding gosub/goto labels in a source I use the regex <code>^s*\w[a-zA-Z_0-9]*:</code></p> <p>The silly thing that happens is that the first 20 characters of the line are selected. Probably as my regex is 20 characters long, but obviously that is a bug.</p>
