DfRefactor - Bug #125

Reindent comment after class ends up at column 0

03/07/2019 07:16 PM - Wil van Antwerpen

Status:	Closed	**Start date:**	03/07/2019
Priority:	Normal	**Due date:**

Target version:			

Description

When re-indenting MessageBox2.dg then the following code:

Class cmbTextBox is a TextBox
// dummy message
Procedure Set CurrentButtonState Integer iState
End_Procedure
End_Class

ends up getting re-indented like:

Class cmbTextBox is a TextBox
// dummy message
Procedure Set CurrentButtonState Integer iState
End_Procedure
End_Class

It should not touch the indent level for the comment there.
