**Description**

If you extract a procedure without any parameters then it does not get invoked from the location where the method is extracted.

**History**

**#1 - 06/02/2019 05:41 PM - Wil van Antwerpen**

*- Status changed from New to Resolved*

Some of the code that determined the method name was inside a parameter check.
Moved it out and this now works as expected.

**#2 - 06/03/2019 04:41 PM - Wil van Antwerpen**

*- Status changed from Resolved to Closed*

Fixed in RC1
