

The Hammer - Bug #154

Search into a collapsed source will not open the node

07/02/2019 01:00 PM - Wil van Antwerpen

| Target version: | | | |
| Description | | | |
| <p>When you run a search for a text like say "#IFDEF WEBAPP " and the text is found but in a collapsed scope block then currently the search does not open that node. So you get a "result" but you have to manually open the collapsed node.</p> | | | |
