

DfRefactor - Suggestion #156

Add line x of y to running process dialog

07/03/2019 01:00 PM - Wil van Antwerpen

Target version:			
Description Logged on behalf of Ian Smith DfRefactor takes a long time to process source files with 10s of thousands of lines. Is it possible to add a line x of y count to the Running Process dialog? The Chilkat wrapper being a prime example 69713 lines. We did look at this before and decided against it back then due to slowing down the process. Perhaps we can do something like updating the every 1000 lines which probably won't slow down things much.
