

vWin32fh Windows File Handling - Bug #168

Load of Windows.pkg on wrong position

01/08/2020 01:52 PM - Arnold Franken

Status:	New	Start date:	01/08/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
DataFlex 20.0			
The load of windows.pkg in vwin32fh.pkg should be between #IFDEF Is\$WebApp/#ENDIF instead of below the #ENDIF (see attached solution).			
The current source gives a compiler warning when the package is used in WebApp.
