

SyncFusion Library - Bug #176

Export functionality does not work when grouped

10/07/2020 11:16 AM - Wil van Antwerpen

Description			
<p>Albin reported to me that there's issues with the Pdf/Excel/Csv export when you the list has a group active.</p> <p>The error is deep in the bowels of syncfusion and it isn't 100% sure at this moment why.</p> <p>There's currently 2 workarounds.</p> <p>The first one is easiest. Disable this functionality when a group is active.</p> <p>The second one is a tad more involved and requires some changes to the javascript wrapper and does not work if you use any aggregates (see reply below)</p>

The second workaround involves making changes to sfWebList.js, look for function onToolBarButtonClick and change from:

```
var objId = this._eControl.id;
if (args.item.id === objId+'_pdfexport') {
    grid.pdfExport();
}
else if (args.item.id === objId+'_excelexport') {
    grid.excelExport();
}
else if (args.item.id === objId+'_csvexport') {
    grid.csvExport();
}
```

to

```
var objId = this._eControl.id;
var ExportProperties = {
    dataSource : grid.dataSource
};
if (args.item.id === objId+'_pdfexport') {
    grid.pdfExport(ExportProperties);
}
else if (args.item.id === objId+'_excelexport') {
    grid.excelExport(ExportProperties);
}
else if (args.item.id === objId+'_csvexport') {
    grid.csvExport(ExportProperties);
}
```

As it isn't perfect and is likely to have its own side effects we have not currently applied this one.

The basics for the first workaround can be found in the SyncFusionOrderSwedish.wo view.
