

COM Manifest Manager - Bug #3

Not recognizing a registered COM component.

<b>Description</b>			
I selected a .dll COM component in the "Create New Manifest Fragment File" dialog, then clicked "Check". The returned msg was that was not registered, but I knew that is was registered. After digging I found the problem. There was a difference in case.			
I changed one line of "IsCLSIDRegisteredFromCOMComponent" method in the "cManifestSideBySide" class.			
Move ( <i>Uppercase</i> (sValue) contains <i>Uppercase</i> (sCOMComponentFileName)) to bRegistered			
Bold text is what I added.
