Target version:			

Description

WvA Reports:
1. filenames in the bottom tab include the foldername (or an ellipsed form of it), could you please just strip the folder bits. It is taking up so much space.
2. Just having the full path in a tooltip is more as enough for me personally.
3. Finally I prefer one row for the tab bar instead of multiple rows, so would be nice if we can add configurable option for that.
