

The Hammer - Bug #55

INI file does not use defaults when upgrading

06/22/2017 05:50 PM - Wil van Antwerpen

Description			
<p>The other day I noticed that my "recent workspace" list was not shown at all. It looked like it did not work.</p> <p>The default set for workspaces is 15 and that works when you create a new INI file. The default however is NOT used when the INI file already exists and it justs add a new element.</p> <p>So in my case the recent workspace list was setup as having 0 items.</p>
