<b>Description</b>			
Trying to complete Class (first time appearance) - code list is empty, see image.			
If you then press backspace and space again, it will show the proper codelist.			
While Sergey can reproduce this at will, I only see it every now and then.			
Note also that when the codelist does show up that it has an empty item at the end of the list, this might be related.

I managed to track down why the empty drop down list sometimes showed up, so I hope that by eliminating that, it also fixes this.

The empty drop down showed up because of triggering the auto complete list without providing items to list.  
If the list is empty the list does not have to show (d'uh)

Also found why there was an empty item at the end of each list. This turned out to be because of attaching a separator character after each list item.  
That's quite OK, except for adding it at the last item.

#### #2 - 07/25/2017 08:42 PM - Wil van Antwerpen

- Status changed from In Progress to Resolved

I think this issue has been resolved?
