

The Hammer - Feature #64

Use annotations for warnings and errors

06/25/2017 03:17 PM - Wil van Antwerpen

Status:	New	Start date:	06/25/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description Might be used to highlight warnings and errors. eg: Number nValue {Bad variable name, try to use more specific names! eg. nBalance or nQty} (1 + 2)) {Brace missed} If (true) Send None Else Send None {Else without command or ';' missed!} Object End_Object End_Object {End_Object without object} etc.
