The Hammer - Bug #83

Shortcut keys on translated dialogs are static

Description

On dialogs - for example find in files - there's shortcut keys displayed on buttons and other controls.
They no longer match with the default english definitions because those were made with On_Key statements
Eg.
in English the Alt+F shortcut key is displayed as "&Find" whereas on Spanish it still is Alt+F with the label displaying "&Buscar"

Of course it should also change that shortcut key to "Alt+B"
