

The Hammer - Bug #85

code collapse is executed when the user clicks anywhere between the [-]

08/29/2017 09:31 AM - Wil van Antwerpen

Target version:			
Description			
To test this:			
<ol style="list-style-type: none">1. Load the Order Entry WS2. Load Order.vw3. Scroll down to say line 434. The code collapse [-] should be on line 435. Now click the space between the [-] symbol on line 43 and the next [-] on line 52 – not the actual [-] symbol6. Notice the code collapses ? This can have a weird effect if you just start clicking

- Assignee set to Wil van Antwerpen

This has been resolved by adding a check that the line on which the click was registered is actually a code folding point.

#2 - 09/12/2017 11:49 PM - Wil van Antwerpen

- Status changed from In Progress to Closed

Fixed in revision 265. We are now testing if the click was on a fold point.
