

## The Hammer - Bug #95

### Error on close after deleting a file currently edited in Windows explorer

10/18/2017 02:55 PM - Wil van Antwerpen

<b>Target version:</b>			
<b>Description</b> Sometimes I just delete a file outside of the editor I'm working in. If I do that with a file in The Hammer3 and then try to close the file I get errors and can't close the file. Ack			

#### History

- Status changed from New to Resolved

Was fixed in build 20180904

cEditorEdit.pkg, deleting a file and switching back to the Hammer would trigger an annoying error that the file could not be opened (do'h). As it was an unending error it was useless. If the file is deleted, now the "has the file changed" logic will see that the file no longer exists and not try to reload.

Note that the file will change to read only as well, so you can't edit it anymore, but you can use "Save as" to save it as another file.
